

## THE IBSVDS FREEBSD VIRTUAL DEDICATED SERVER

At IBSPoint we provide the most reliable web hosting services available. Through global industry leaders in providing world-class hosting and SaaS solutions to small, medium and enterprise businesses. So whether it's a website, e-commerce, Web 2.0 application, or a complex clustered server solution, our hosting services deliver robust performance and reliability that you can count on to support all of your hosting needs.

### What is an IBSPoint FreeBSD VDS Server?

An IBSPoint Virtual Dedicated (VDS) Server is the most innovative, complete and fully-featured Virtual Server available anywhere on the Internet. Unlike other providers who offer you low-grade virtual hosts or "virtual servers" which have only limited features and capabilities.

- » Basic
- » Business
- » Advanced
- » Professional

### Full daily backups and multi-level backup archiving

of all of the data on all of our client servers is also included as part of the service at no additional charge.

IBSPoint Virtual Dedicated (VDS) Servers utilize the highly secure and reliable FreeBSD operating system, which also features Linux compatibility which allows over 90% of Linux software to be run on our servers

Virtual Server Resellers, Web Designers and Web Hosting Providers who already have a virtual server with another provider are encouraged to upgrade to a IBSPoint Virtual/VDS Server and enjoy lower monthly rates and access to advanced features and services such as fully-controllable Virtual DNS Servers and Multi-User Virtual Telnet which allows you to set up UNLIMITED Telnet/SSH accounts for your users.

IBSPoint technical support department can provide assistance with relocating your client base smoothly, seamlessly and without downtime to their new Virtual Dedicated Server IBSVDS, or <IBSRack Dedicated Server>. For more information CONTACT [service@ibspoint.com](mailto:service@ibspoint.com)
